

**Peter Proff**

Professor Proff is the Head of the Department of Orthodontics at Regensburg University Hospital, Germany.

After he studied medicine and dentistry at Frankfurt and Würzburg University, he specialized in orthodontics, obtained his postdoctoral lecture qualification and was appointed assistant department director in 2007. Professor Proff published almost 100 original articles on basic research and clinical issues and is member of the editorial board of several scientific journals. His current research focuses on growth and development of craniofacial structures, biomechanics and orthodontic material development and testing (adhesives, arch materials, brackets, mini screws).
